

## Our Mission:

We promote,  
encourage, and  
support planting natives  
to increase  
biodiversity and  
restore habitat  
to protect our  
ecosystems.

*The more you learn,  
the more you care.*

**transition town**  
greater media biodiversity

The **Biodiversity Group** is an initiative of **Transition Town Media**. Transition Town Media is dedicated to promoting sustainable, resilient communities. TTM is a 501c3 organization.

# Gardening for Wildlife

**transition town**  
greater media biodiversity

## What We Do

- 🌱 Educate
- 🌱 Advise
- 🌱 Support
- 🌱 Collaborate

## Why We Do It

- 🌱 Stop bird and insect decline
- 🌱 Stop habitat loss
- 🌱 Restore biodiversity
- 🌱 Prevent ecosystem collapse
- 🌱 Mitigate climate crisis

## How We Do It

- 🌱 Garden tours
- 🌱 Mentoring
- 🌱 Plant and seed sharing
- 🌱 Educational materials
- 🌱 Monthly blogs
- 🌱 Monthly meetings
- 🌱 Involve kids
- 🌱 Invasive plant information
- 🌱 Discourage pesticide use
- 🌱 Joint projects with other groups

## What You Will Learn

- 🌱 Where to buy native plants
- 🌱 How to choose the right natives for your garden
- 🌱 How to establish and maintain your new garden
- 🌱 How to recognize and remove invasive species
- 🌱 How to provide habitat for our native pollinators
- 🌱 How to educate your neighbors and local officials about the benefits of natives

## It's No Secret

We're in a climate crisis, but did you know our climate is regulated by ecosystems? Ecosystems depend on a rich biodiversity to function. And biodiversity is dependent on native plants that feed insects. At this critical time for wildlife, they need us to support their needs.

All across the country, people are waking up to the importance of biodiversity and native plants. We have an opportunity to contribute to this movement. Interest is high in Media, where several groups are working to preserve green spaces and plant natives.

Insects are a very important part of the web of life. To stop insect apocalypse, we need to plant the natives they need to thrive. Our native plant gardens really are that important!

## We'd love for you to join us!

Gardeners of all levels of experience are welcome. Anyone can contribute, even if you live in an apartment. As a member of our group, you have the opportunity to make a significant contribution to help prevent insect and bird decline, habitat loss, and global ecosystem collapse.

### Meetings:

Our Zoom meetings are on the third Wednesdays of each month at 7PM.
